

Why triLift?

As you age, your face begins to sag and it loses the youthful shape it once had. triLift is able to address that sag and other concerns where they really begin, the muscles, in just one treatment*.

triLift gives you a face lift-like effect without injections or surgery!

What is it?

triLift is the hottest new treatment in aesthetics to utilize Dynamic Muscle Stimulation so you can achieve an effect similar to a face-lift. This treatment addresses your facial concerns so you LOVE what you see in the mirror.

Is it right for me?

Lumenis energy-based treatments are not suitable for everyone and do carry some risks. triLift treatment is not suitable for patients with pacemakers, defibrillators, or any implanted electronic devices, as well as metal implants in the treatment area. Risks may include damage to natural skin texture, skin redness, swelling, bruising, and itching. Be sure to consult with your treatment provider before choosing this treatment.

What should I expect?

When will I see effects?

triLift treatment effects are immediately noticeable! For the best and longest lasting results, a course of 4-6 weekly treatments is recommended.

Note: You may experience some temporary redness or swelling, depending on the treatment plan your practitioner creates for you.

Each triLift treatment takes about 30 minutes and you can return to your daily activities immediately after.

How does it work?

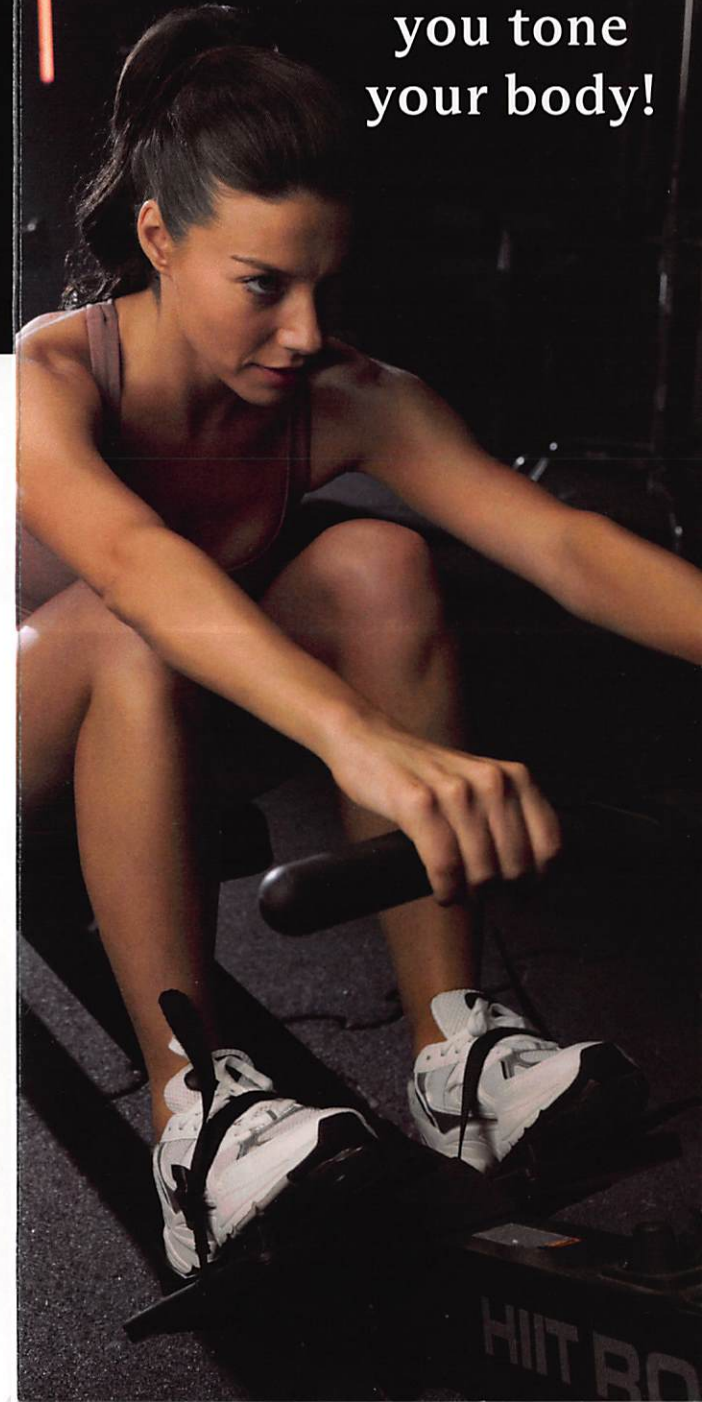

With age, the skin sags and shows lines and wrinkles, the fat pads dwindle, causing facial depressions, and the muscles weaken and contribute to the sagging appearance and the distorted jawline.

triLift targets and stimulates the natural process with a technology that tones the muscle, with Dynamic Muscle Stimulation DMSt. triLift reduce facial wrinkles, smooths, and resurfaces the skin, achieving a face lift-like effect.

After one treatment*, you can expect an immediate face lift-like effect. triLift treatments are safe, pleasant and quick, and improve over time with every additional session, helping you regain the triangle of youth.

*A course of 4-6 weekly treatments is recommended.
